

Juandr  Claude Prinsloo

Software Developer

10.07.96

ABOUT ME

After completing high school I gained experience/knowledge in various areas and throughout my studies I realised that my passion lies in software development.

I enjoy taking an idea and developing it into a functional outcome. Working with software is intriguing and I am motivated to solve problems.

I am looking for a intermediate developer position where I can gain more experience. I am a hard worker and will go the extra mile in everything I do.

OTHER ACTIVITIES

When I'm not working/studying, I enjoy the outdoors, being active and spending time with friends and family.

PERSONAL TRAITS

- The ability to follow instructions and deliver quality results
- Successful working in a team environment, as well as independently
- Challenge and goal driven
- Fluent in Afrikaans and English

WORK SKILLS

- C#
- Vuejs
- Reactjs
- HTML
- Css / Scss
- .Net Core
- Docker
- MySql / SQL / MariaDB
- Javascript / Typescript
- Nuxtjs / Nextjs
- Blazor / Razor pages

WORK EXPERIENCE

Realm Digital

Jan 9th 2020 - current

Working Remotely

In my tenure of over five years at Realm Digital, I have made substantial contributions to various projects. This experience has allowed me to deepen my knowledge of coding practices and refine my skills. My hands-on involvement in these projects has given me the opportunity to develop practical solutions and innovate for a diverse range of technical challenges.

- **Automated Statement Reconciliation and Payment Application** (Large Banking Firm) - **Netcash**
 - Developed a sophisticated application for a prominent banking firm, seamlessly integrating it with Xero, a leading accounting software.
 - Facilitated automatic statement reconciliation and mapping of transactions to specified accounts, streamlining financial processes.
 - Enabled users to efficiently make and receive payments from clients and customers, enhancing transaction management.

WORK EXPERIENCE

- **Multi-Tenant Website with Headless CMS** (Leading South African Insurance Company) - **Sanlam**
 - Spearheaded the development of a large-scale multi-tenant website catering to one of South Africa's major insurance companies.
 - Implemented a headless CMS solution using Wordpress, empowering the client to create, update, and modify website content with utmost ease.
 - Leveraged API integration to collect individual user data and dynamically generate personalized web pages for each customer.
- **Digital Sign-Up Solution for Insurance Products** (Leading South African Insurance Company) - **Sanlam**
 - Contributed to the creation of a cutting-edge digital sign-up system for a range of insurance products.
 - Implemented secure and legally binding digital signature capabilities for document signing, enhancing the customer onboarding process.
- **POC Mobile Application for Logistics Company** (Large Logistics Firm) - **Imperial Logistics**
 - Led the development of a Proof of Concept (POC) mobile application for a major logistics company.
 - Successfully integrated various existing applications into a unified platform, offering employees convenient access to notifications and work-related information.
 - Enhanced organizational efficiency by providing a streamlined and cohesive mobile experience for employees.
- **International Freelance Transcription Application** (Global Transcription Service) - **Way With Words**
 - Developed an innovative international application catering to freelance transcribers and businesses worldwide.
 - Enabled efficient transcription of video and audio files, supporting businesses in obtaining accurate and timely transcriptions for their content.
 - Facilitated seamless collaboration between freelance transcribers and businesses, fostering a global transcription community.

NML (NEW MEDIA LABS) - JUL - DEC 2019

I worked as a developer on an internal project for a rewards system of the company (NML). The project name is "HighFive" and is written using C#, TypeScript and HTML5.

I've worked on integrating the rewards system application with Microsoft Teams for pushing notifications on the company messaging channel. Another feature that I have worked on involved the integration with a third party API called TuYu for distributing monetary rewards within the company.

I worked successfully in a junior team of 3 to complete these tasks. The project was fully unit tested and I worked on adding logging and monitoring for events and payments to Microsoft Application Insights.

EDUCATION

Pearson Institute of Higher Education (CTI)

Information Systems Engineering Higher Certificate - 2018 to Current

- Computer literacy (Microsoft) 85% average
- Personal Skills Development 88% average
- Processing and logic concepts 75% average
- Program Design 71% average
- Hardware essentials 70% average
- Software Engineering 75%
- Database Design Concepts 75% average
- Database Management 72% average
- C# Programming (Unit 1,2 & 3 completed) 75% average
- Network+, Security+ and Final information Systems

Master Maths

- Math Certificate - 2016

Completed a bridging course for higher mathematics

Ocean Star Sailing Academy

National Powerboat Certificate - 2015

- Day skipper license for up to 11 meter Sail boat
- Personal survival techniques
- Diesel engine
- Radar
- Deck crew training
- Certificate of Proficiency (Marine Fire Fighting)
- Medical first aid
- Personal safety and social responsibility
- Competence in security Awareness

Randburg High School

Martic Certificate - 2014

November 2019

To whom it may concern,

LETTER OF REFERENCE – JUANDRE PRINSLOO

This letter hereby certifies and provides details regarding my interactions with and perception of Juandr  Prinsloo during my employment at New Media Labs Services (NML), a specialist financial services software development company.

Juandr  was appointed on a 6 month fixed term contract from 1 July 2019 – 31 December 2019 as a Developer in our Training Academy Program for young graduates. During his period of employment, he worked closely with our Chief Technology Officer on internal projects, learning about agile processes as well as best practice principles within software development.

It was wonderful to see how quickly Juandr  settled in at NML. He is easy to get along with and has proven to be a good team player. He also makes a conscious effort to address any constructive criticism he is made aware of and has grown a lot as junior developer since he started here.

During our employment together, I have known Juandr  to be a very pleasant and enthusiastic youngster. Unfortunately two of NML's valued clients have indicated that due to financial constraints, they have to reduce the costs allocated to development. Naturally, this will eventually affect our operational requirements. At this stage we are thus not in a position to renew any of our Training Academy contracts. Should an opportunity arise at NML in future and we are able to, I have no doubt that we will gladly welcome Juandr  back.

Please do not hesitate to contact me should you require any additional information.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Luhani Venter', written over a thin diagonal line.
